

We are beginning a new program here at **Pediatric Associates of Wellesley** that allows us to track your child's development. Starting immediately, we are using an Internet-based system called CHADIS. This program asks you, who know your child best, to report on his or her development by completing screening questionnaires before each well-visit. This information is then available, through secure links, to your provider for review before your visit so that we may discuss any concerns together.

The questionnaires you will find on CHADIS are state-of-the-art screening tools and have been selected by Pediatric Associates from the many available screening tools. They are validated and recommended by the American Academy of Pediatrics and the Massachusetts Department of Health, among other authorities. Once you register and give your child's birth date, CHADIS will provide you with age appropriate questionnaires.

To use CHADIS, please go online to register at www.CHADIS.com and follow **all** prompts during this Initial Registration so that you can begin using CHADIS for your next well-visit. On the home page, click "**New Users Register Here**" and as a **new user**, you will be asked to enter the "Invitation Code" that links to our office. The code is our office telephone number.

7817360040

Once you enter the site, you will be asked to create a username and password for yourself. Your email address is the best username, if you have one. Print out this page and write your new username and password in the boxes below:

My Username

My Password

Please create a CHADIS account as soon as possible. We expect you to log on 1-2 weeks prior to your child's well-visit appointments to help assess your child's development.

CHADIS will send you reminders about recommended well-visits (based on your child's age, not on the PAW appointment schedule) and we will remind you to log on to CHADIS when we confirm your appointment.

As a partner in your child's healthcare, your input is essential in helping us to provide your child with the best care possible. As always, we are dedicated to this goal and we feel CHADIS is a great new tool for achieving it.

Thank you and be well,
Pediatric Associates of Wellesley
